OF DREAMS

2024

What do you see when you look at a backyard, front porch, or driveway?

At Unilock, we see possibilities.

Possibilities to build works of art and personal playgrounds. Possibilities to bring families together for a birthday barbecue or a wedding reception. Possibilities to transform your imagination into remarkable outdoor spaces, and build connections stronger than the concrete underfoot.

And we don't let possibilities go to waste. Built on 50 years of innovation and sustainability, Unilock provides customers the tools to transform dreams into reality. We connect you with proven contractors and supply an endless canvas of materials, but the final product is always uniquely yours. And when your project is complete, you don't just have something beautiful, you've changed the way you see the world.

So, where can you see possibilities, and how can we help you build them?

Dream

Begin with a dream
of what's possible

Imagine an outdoor space where the inspired use of patterns, textures and shapes not only creates design-envy, but elevates your world in the most beautifully functional way.

Discover Unilock Coatings

Feels 3x better on bare feet than ordinary pavers.

A special finishing process creates the ultra-smooth and silky surface texture of Comfort Step. This special technology results in a remarkably tight surface that is factory sealed to create a unique sensory experience that is velvety-smooth and cool underfoot.

Details on Page 58

Available exclusively on Elegance and select EnduraColor products, EasyClean enhances the surface color and provides integral stain resistance.

Surface Finishes

Exposed Granite

Marble, granite and quartz particles are embedded into the product's surface and are later exposed through additional processing methods.

SERIES™, TRIBECA COBBLE™, PROMENADE

ColorFusion™

Color and granite particles are randomly dispersed to achieve a unique mottled surface.

UMBRIANO®, U-CARA®, PROMENADE™

Timeworn

Various methods are employed to obtain this weathered, timeworn finish, but in every instance, this patina improves the appearance.

TOWN HALL®
COURTSTONE®
BRUSSELS BLOCK®
BRUSSELS DIMENSIONAL™

Brushed

ARTLINE™, IL CAMPO®, PROMENADE

Accentuated by artistically intriguing etched lines, this surface is available exclusively from Unilock.

Artista

GRANITO™

The look of boldly mottled granite is achieved with a proprietary process called Artista.

Products enlarged to show surface texture.

Choose your Color

MONOCHROMATIC OR CONTRAST

For an intimate atmosphere, dominate with warm colors, while still incorporating cool tones to create contrast and achieve a visual balance.

Choose your Shape

SHAPING YOUR OUTDOOR PROJECT

Finding the right shape to fit your outdoor project is like placing the last puzzle piece on an exquisite work of art. It just fits! What's more, combine different shapes together to deliver a two-for-one hardscape punch that will elevate your artistic vision to new heights.

- RECTANGLE
- HEX
- SQUARE
- PLANK

What will you create?

Let your imagination run wild in the playground of Unilock paving products!

HISTORIC

Find your Style

Whether you're designing a quaint backyard refuge or an ultra-modern driveway, we have a variety of paving products that'll turn your outdoor space into a little slice of heaven.

TRADITIONAL

CONTEMPORARY

GEOMETRIC

Pick your Pattern

PLAY WITH ANGLES

From herringbone to basket weave, the right angle can make all the difference! A Unilock Authorized Contractor can recommend the best laying patterns based on the products you choose.

RANDOM

LINEAR

DESIGNER

STACKED

BASKETWEAVE

HERRINGBONE

THINK OUTSIDE THE BOX

Distinct laying patterns can help define unique "rooms" across your outdoor space, giving you countless design options.

Visit Unilock.com for laying patterns.

Unique Touches

Let your creativity shine! Unilock border and banding options can help enhance your distinctive designs and add touches of elegance to your driveway, walkway, patio or vertical features.

Make a dramatic impact with non-linear designs. Like the atypical array of hexagon-shaped pavers, or a pixelated look created with light and dark square pavers.

Take it a step further with multiple borders, pixelated paver rugs or contrasting geometric grids.

JOINT MATERIAL

Joint material plays an important role between pavers by keeping out weeds and other debris. However, the color you choose can also have a dramatic impact on the look of your project. Your contractor can help you decide what will work best.

Clean, opposing angled lines in this poolside patio create the effect of a chevron, unifying upper and lower decks.

Pavers: Beacon Hill™ Smooth (Opal) with Hollandstone™ (Dark Charcoal) accent

Fire Feature and Raised Patio: Lineo™ Dimensional Stone (Charcoal) with Universal coping (Dark Charcoal) and steps

This elevated backyard patio raises the bar with a stunning fire feature, lounge seating and feature lighting at night.

Clean, granite-like pavers make this ultra-modern pool deck comfortable and cool underfoot on hot, sunny days. Adding to the ambiance of this summer escape is a soothing water feature.

Pavers: Umbriano® with Umbriano coping (Grenada White)
Water Feature and wall: U-Cara® Umbriano with Umbriano coping (Grenada White)

Scan here for project video

An array of grey and black pavers in the driveway and backyard creates a super sleek, ultra-modern geometric playground.

Driveway Pavers: Series™ (Arctic Grey and Nordic Star) with Series (Onyx Black) accents and custom color inlays

Patio Pavers: Beacon Hill™ Smooth (Granite Fusion) with Series (Onyx Black) accents

Wall: U-Cara® Smooth (Opal) with U-Cara Series (Onyx Black) accents

Scan here for
project video

Pavers: Beacon Hill™ Smooth Slab (Granite Fusion) with
Natural Stone (Black River) accent and Beacon Hill Smooth
(Dark Charcoal) accents

Firepit and Kitchen: Lineo™ Dimensional Stone (Granite)
with Beacon Hill Smooth (Dark Charcoal) accent

Large, contemporary
slabs accented by
contrasting paver bands
create a generous
sense of space for this
intimate, multi-purpose
backyard.

Richcliff® (Dawn Mist) with Copthorne® (Basalt) paver rug and Courtstone® (Basalt) accents and Natural Stone (Stone Cliff Grey) slabs

A blending of natural stone and historic brick textures laid in a variety of patterns makes this project a visual feast.

This fire table is a happy hour haven, where guests can laugh and linger the night away.

Pavers: Bristol Valley® (Steel Mountain) with Cophorne® (Basalt) accent

Grill Island: Brussels Dimensional System™ (Sierra)

Scan here for project video

This expansive entertaining space offers an outdoor eating area and firepit lounge, visually defined by a herringbone paver carpet.

Pavers: Umbriano® (Winter Marvel) with Copthorne® (Basalt) accent

Vertical Features: Rivercrest™ Wall (Coastal Slate) with Copthorne® (Basalt) accent and Ledgestone™ coping (Grey)

Scan here for project video

Richcliff® (Dawn Mist and Pebble Taupe) with Courtstone® (Basalt) accent and Ledgestone™ (Buff) step treads

This Craftsman home features the strikingly detailed riven texture of Richcliff, delivering classic elegance.

This sunken patio and adjacent grill island is a clever fusion of form and function that elevates this intimate space.

Upper Patio Pavers: Bristol Valley™ (Steel Mountain) with Town Hall™ (Basalt) accent

Lower Patio Pavers: Artline™ Smooth (Granite Fusion) and Artline (Granite Blend Il Campo® Finish) with Town Hall (Basalt) accent

Seat Wall, Firepit and Grill Island: Lineo™ Dimensional Stone (Sierra) with Ledgestone™ (Buff) coping and step treads

Scan here for project video

Old world charm mingles with modern-day style in this enchanting backyard.

Pavers: Beacon Hill™ Smooth (Granite Fusion) and Town Hall™ (Basalt)

Vertical Features: Lineo™ Dimensional Stone (Granite) with LedgeStone™ coping and pillar cap (Grey)

Scan here for project video

Distinctive, winding paver pathways both define and lead to the outdoor rooms of this sprawling backyard.

Pavers: Copthorne® (3 Color Blend with Basalt accent) walkways with Beacon Hill™ Smooth (Granite Fusion)

Grill Island: U-Cara® Pitched (Granite Fusion) with U-Cara Smooth (Dark Charcoal) accent

Scan here for project video

Each level in this lakeside retreat is a brilliant composition of classic and modern textures.

Pavers: Beacon Hill™ Flagstone (Sierra) with Cophorne® (3 Color Blend) and Brussels Block® (Sandstone) accents

Vertical Features and Steps: U-Cara® Umbriano (Summer Wheat) with Natural Stone coping (Indiana Coast)

Scan here for project video

Scan here for
project video

Pavers: Beacon Hill™ Smooth Slab (Fossil) Cophorne®
(Basalt) accent

Retaining Wall and Grill Island: U-Cara® Smooth (Fossil)

An elevated platform sets the stage for next-level entertaining with a half circle bar and grill island, pool and loungers.

Pavers: Copthorne® (Basalt) with Richcliff® (Dawn Mist) and Beacon Hill™ Smooth (Opal Blend) border

Step Treads: Natural Stone (Stone Cliff Grey)

A gently curved walkway brings visitors to the front entrance with Copthorne pavers laid in a traditional herringbone pattern.

Contrasting colors are woven into a traditional herringbone pattern to create a distinctive, modern vibe in this backyard space.

Pavers: Mattoni™ (Granite Blend and Dark Charcoal) with Bristol Valley™ (Fossil)

Walls, Steps and Pillars: U-Cara™ Pitched (Granite Fusion) with U-Cara Umbriano™ (French Grey) and Mattoni (Dark Charcoal) accents with Ledgestone™ (Buff) coping and pillar caps

Pavers: Treo® Smooth (Granite Fusion) with Cophorne® (Basalt) accent

Firepit: Brussels Dimensional System™ (Granite) with Ledgestone™ (Buff) coping

Retaining Wall, Steps, and Vertical Features: U-Cara® Smooth (Granite Fusion) with Ledgestone (Buff) coping

Scan here for project video

A curved seat wall leads to a circular fire pit, with a sizable pool deck perfect for entertaining the family.

County Wide Landscaping **Best in Show Winner**

The pergola was built using Lineo™ Dimensional Stone, topped with Ledgestone™ pillar caps in a grey hue to complement the minimalistic design of the backyard space. Patio lighting was installed under the pillar caps on the patio, creating a soothing ambiance that helps guide visitors at night.

On the upper deck an outdoor kitchen was designed using Lineo™ Dimensional Stone, complete with a grill, bar island and granite countertop, with bar stools to accommodate multiple guests. Finally, nestled towards the rear of the yard, an enclosed seating area features a cozy fire pit, allowing guests to relax and unwind on crisp summer nights.

The result is a stunning outdoor space that transformed this backyard into a haven that will be enjoyed for years to come.

“The homeowners envisioned a modern, outdoor sanctuary.”

The scope of this 2,400 sqft residential project presented a number of challenges, one of which was elevation. “There was a lot of grading that had to go into this to make the project work,” says Brian Larson, President of County Wide Landscaping. “That’s why it’s a three-level patio.”

The finished space features a monochromatic pool deck in a beautiful mosaic-like geometric design, with square paver slabs interspersed with zigzagging lines of artificial turf. A putting green lies adjacent to the space, along with a breathtaking waterfall cascading from the roof of a shaded pergola.

“Unilock provided the sleek, modern look we needed to achieve this extravagant design”

Brian Larsen

Products

Capture the eye with exclusive products

From weathered cobblestone to contemporary linear, our product selection reaches beyond the horizontal to include garden walls, pillars, steps, fire tables and fountains. Rock the look that is unmistakably you, and undeniably Unilock!

Beacon Hill™ Smooth and Mattoni™

Unilock Product Categories

CLASSIC

Our **budget-friendly** Classic products are manufactured to exceed ASTM standards for quality and strength.

ENDURACOLOR™

The refined look of our EnduraColor products is achieved with a two-step manufacturing process that uses concentrated color and **wear-resistant** finer aggregates to protect the surface from the appearance of fading over time.

ELEGANCE™

Our Elegance collection offers timeless beauty with styles you can't get anywhere else. From the classic luxury of riven natural stone slabs to the timeworn look of European cobblestones, the look you purchase is **the look that will last.**

Project Cost

Choose the product you love to get the maximum enjoyment from the investment you've made below the surface.

Don't Compromise

Many products look great when they're first installed, but after time the difference in quality shows.

In an average project, only 20% of the overall cost comes from the paver and wall products you choose, so don't be tempted to compromise.

Think Green

More and more households are opting for permeable paver projects as a sustainable, cost-effective and environmentally friendly alternative to traditional pavers.

Developed in response to growing concerns around stormwater management, permeable pavers allow rainwater to flow between the joints of pavers and back into the subsoil. This provides a dual "green" benefit: by naturally filtering out pollutants before stormwater reaches waterways, and by providing extra moisture back into surrounding plant material.

Using permeable pavers will decrease rainwater puddling on the pavement, effectively reducing the risk of ice buildup which is a benefit particularly useful on driveways.

For homeowners who live in regions where local codes require them to reduce impervious surfaces on their lot to accommodate a new landscape feature like an in-ground pool, permeable paving is a popular alternative to conventional poured-in-place concrete or asphalt.

Some homeowners install rainwater collection systems underneath their paver projects to supply water to in-ground sprinkler systems!

Permeable Pavers

Special materials are used in the joints and in the permeable base below, to encourage water to flow through and reach the subsoil.

Permeable pavers look similar to traditional pavers but are designed with special spacer bars that create a wider joint.

Permeable Collection

In 1991, Unilock introduced the first permeable paver to North America. Since then, we've worked to produce the most extensive collection of permeable pavers in the industry.

Ultima™

Courthouse

What makes Ultima concrete so strong?

In a word, fluidity. During manufacturing, we use as little water as possible while enhancing the fluidity at the drying stage, resulting in a form that self-compacts at the chemical level. The result is an extraordinary product that is unlike anything you'll find outside of Unilock.

With Ultima

Unilock Town Hall pavers are built to last

Without Ultima

Deteriorating brick pavers exposed to deicing salts

Only Unilock has the technology in North America to manufacture Ultima Concrete resulting in pavers **up to four times stronger** than poured concrete. With Ultima, the look you purchase is the look that will last.

Exclusive to **UNILOCK**

ELEGANCE™

Ultima Concrete is a key ingredient in the **timeless beauty** of our Elegance collection of premium pavers.

Reala™

When it comes to creating **realistic textures** that are indistinguishable from brick, cobblestone, or flagstone, there is no room for compromise.

Any paver meant to imitate a classic building material needs to embody its look, its feel, and its strength.

At Unilock, we've been capturing all three since 2004 with our Reala technology.

How do we achieve a random appearance?

First, we cast a multitude of pavers from molds of actual flagstone, brick, and cobblestone. Then we randomize the casting process. With so much variation between molds, we can then ensure that any paver installation avoids repetition, no matter how large or small the project.

Utilizing REALA technology, a multitude of natural stone surfaces, brick and historic cobblestones are cast to create a wide variety of **authentic textures** with consistent dimensions that are more cost efficient to install.

ELEGANCE™

EasyClean™

Integral Stain Resistance

AFTER

Stains set for thirty minutes, then removed with damp paper towel, hand scrub brush and mild soap.

BEFORE

What does this mean for stains?

Any spill that does manage to land on an EasyClean paver can be quickly and easily wiped away – no deep scrubbing or heavy cleaners needed.

Exclusive to **UNILOCK**

Unlike after-market sealers which merely coat the top, EasyClean goes beyond the surface and becomes integral to the product during manufacturing. The result is enhanced surface color, and stain resistance.

EASYSKLEAN ADVANTAGES
Pavers are pre-sealed at the factory
Enhanced resistance to weathering
Reduced dirt absorption
Stains from leaves, coffee, ketchup, mustard, wine and BBQ oils are easier to remove

See how it works

Pavers shown on left hand side are Thrumix pavers without EasyClean. Pavers shown on right hand side are EnduraColor pavers with EasyClean Stain Resistance Technology.

ColorFusion™

Exclusive to **UNILOCK**

The look of natural granite is achieved when color and granite particles are randomly dispersed using proprietary ColorFusion technology to achieve a unique mottled surface.

ColorFusion also available on our U-Cara® Multi-Face Wall System.

ColorFusion is made with the same durable concrete and fortifying manufacturing processes that make Unilock pavers last for decades. Our commitment to beautiful, long-lasting hardscaping products is what built our reputation, and we honor that commitment through continued innovation.

Sustainability Commitment

In 2021, Unilock announced its commitment to becoming a carbon neutral company. We have implemented initiatives that continue to minimize our use of fossil fuels, conserve water and replace cement in our products, while producing the highest quality product.

Learn More

How can you make your project more sustainable?

Make it Permeable

Permeable pavers allow rainwater to flow through the pavement surface and back into the subsoil below, filtering out contaminants that could otherwise flow into stormwater drains and pollute local waterways.

Shop Locally

Choosing products that are manufactured at a Unilock facility close to your home reduces carbon emissions associated with transportation.

Think Lighter

Products that are lighter in color, have a higher solar reflectance. When you choose a lighter colored product, more of the sun's energy is reflected and less heat is absorbed into the pavement surface. This helps reduce urban 'heat island effect' and carries a number of environmental benefits.

EcoTerra™

Paving a Greener Way

EFFLORESCENCE FREE

Richcliff®

EXCLUSIVE TO **JNIOLOCK**

Inspired by the texture of natural cut flagstone, Richcliff offers superior durability and timeless appeal ideal for driveways, patios, walkways and commercial projects.

A multitude of stone textures were cast using Reala™ Technology, to ensure that finished projects will have a completely random and natural appearance. And unlike natural stone, which can crack, split and fade, Richcliff is virtually indestructible.

 **ELEGANCE**

Scan here for project inspiration.

Dawn Mist

Courtstone®

EXCLUSIVE TO **JNIOCK**

The polished look of Courtstone brings a luxurious, old-world elegance, with Ultima™ Concrete Technology providing up to four times the strength of conventional poured concrete.

The unique shapes of Courtstone are cast from real European cobblestones using Reala™ Technology, but manufactured with a consistent base for efficient installation and superior interlock.

Town Hall®

EXCLUSIVE TO **JNIOLOCK**

Modeled after historic North American clay street pavers, Town Hall is perfect for any traditional or permeable applications. The rich colors and classic shape also make it a popular border or accent paver.

Town Hall textures were cast from a multitude of different surfaces using Reala™ Technology, for a vintage, streetscape charm that stands the test of time.

U-Cara® Modular System

Our U-Cara Modular System offers a variety of aluminium frames that can be mixed and matched to construct vertical features like grill islands, fire features and pillars.

Speak to your contractor to select a design and a U-Cara fascia panel finish to suit your project.

U-Cara® Wall Mount System

The U-Cara Wall Mount System allows you to put the finishing touches on your project by cladding existing structures with U-Cara fascia panels.

Ideal for garden sheds, wing walls, exposed foundation, existing steps or concrete and wood substrates.

Firepits and Fire Features

Imagine flames crackling on a cool night, curling up under the stars with friends and family, and sipping a warm cup of hot chocolate. Soak up that sense of bliss from your backyard with a Unilock firepit!

HEAT DAMAGE PREVENTION

To ensure a long-lasting fire feature, direct exposure to extreme heat from an open flame should be avoided. Always construct fire features with a protective heat barrier such as a metal insert, refractory blocks or approved firebrick to prevent potential heat damage.

NOTE: Large fires and extreme heat are detrimental to concrete.

SUNSET FIREPIT KIT

Square shape also available.

PRE-BUILT ELEMENTS

TUSCANY

Pre-built elements are constructed of Brussels Dimensional System™ with Copthorne® or Umbriano® accents. Speak to your contractor for more information.

Lineo® Dimensional Stone

FIREPIT INSERT

Firepit kit comes with a firepit insert (sold separately) that fits securely into the firepit.

Outdoor Kitchens

There's nothing more fun than cooking al fresco. An outdoor kitchen is an entire, defined space dedicated to preparing meals among family and friends, but with a much livelier backdrop!

Brussels Dimensional

Learn about things to consider when designing your outdoor kitchen.

U-Cara

Design Considerations

Think about how you'll use the space, the outdoor appliances you need, the best location for a kitchen in your yard, and how it will weather in the elements over time.

Rivercrest™ Wall

Lineo Dimensional Stone

From a practical side, an outdoor kitchen is an extension of your home's living and entertaining space, allowing you to make the most of your backyard.

U-Cara

Lineo Dimensional Stone

Water Features & Pillars

From fountains and ponds, to waterfalls and custom water features, these soothing additions are a popular way to enhance your landscape design.

U-Cara

Lineo® Dimensional Stone

Brussels Dimensional

Elevate your outdoor space to new heights by incorporating pillars into your design. With varying heights and functions, pillars create a sense of permanence and strength while also adding visual flair. Take it a step further by incorporating landscape lighting into your pillars to set the mood at night.

Creative Ideas

The versatility of Unilock products provides a playground for your imagination. From mixing patterns and colors to create a custom sports court, to utilizing Unilock wall systems to beautify a utilitarian window well, the possibilities are endless!

This small storage area becomes a thing of beauty, paved with Unilock Beacon Hill™ Smooth and Universal Coping treads.

Steps, Treads, Coping & Caps

From classic, fullnose shapes to pitched-face edges, our steps, treads and coping offer a wide variety of choices for the finishing touch on your project.

Design Advice

Unilock Authorized Contractors

Frequently Asked Questions

Protect your Investment

Learn how to take care of your Unilock products to ensure that they stay beautiful and functional for years to come.

Spring 🌸

While the majority of Unilock products require little maintenance, there are a number of preventative steps that can be performed each spring to ensure that your project keeps its pristine appearance throughout patio season.

Examine for "creep" – this is where pavers push out as a result of winter stress, traffic or edge restraint failure – as well as dips, deformations or stains. Should you discover any of these problems, they are fixable; speak to your contractor or reach out to us for solutions. Wash your paver surface with a simple soap and water solution and top up jointing material if necessary.

Fall 🍂

While the leaves changing colors in the fall is a beautiful sight, the stains they leave behind on pavers can be an eyesore. Clean any debris, and remove any planters, barbecues or furniture that may leave behind rust marks.

Winter ❄️

Metal blades on plows or shovels may scratch the surface of your pavers. It is recommended you use plastic shovels or protective plastic blades on your plows or snow blowers. Although Unilock products are resistant to de-icing salt, it is strongly advised to use calcium-based products or rock salt (sodium chloride) to melt ice.

Note: Avoid magnesium-based de-icing products as they are very aggressive and may cause damage to the surface of pavers.

STOP WEEDS BEFORE THEY TAKE ROOT

Weeds do not grow up from the soil below. Instead, dirt and weed seeds blow in from adjacent lawn and garden areas and may germinate in between the joints. Keeping the joint sand topped up near the surface will help the weed seeds to blow over the joint and not into the joint.

IN THE PAST - Basic sand was the only jointing material available. Rain would erode the sand if it wasn't replaced frequently, leaving parts open to vegetation growth.

TODAY - There are new types of sand-stabilizing compounds and polymeric jointing materials that relieve homeowners of this maintenance worry.

Finding the Right Fit

Even the best materials can be spoiled by subpar installation and craftsmanship, which is why choosing the right contractor for the job is the most crucial decision for your project. Remember that the cheapest quote is rarely the best option, so make sure to ask the right questions.

NEED HELP FINDING A QUALIFIED CONTRACTOR?

Unilock Authorized Contractors have met our exacting standards for installation methods and business practices. Connect with us online, by phone or at one of our locations and we'll be happy to connect you with a contractor in your area who is guaranteed to do the job right.

Register online at [Unilock.com](https://www.unilock.com) and we'll match you with a Unilock Authorized Contractor in your area.

8 Tips for Choosing a Contractor

1 WORKMANSHIP

Ask to see completed projects from more than two years ago to see how their work holds up.

Are the curves of the project cut in a way that minimizes large gaps? Are small or awkward cuts minimized?

Have edge restraints been used and are they still in place?

How long does the contractor guarantee their work?

Has there been a warranty claim filed against the company in the past two years?

2 SUB-CONTRACTING

Some contractors will hire other companies to perform parts of the work, like lighting and irrigation. Be sure to ask how these sub-contractors will be managed or vetted.

Scan here for a Project Planning Guide and helpful Contractor Checklist.

3 EXPERIENCE

How long has the contractor been installing pavers and walls?

Has the contractor installed projects in the past with the features you're considering?

4 PREPARATION

What are the contractor's base preparation methods?

What materials are used and why?

Is there a standard procedure for base preparation or will the contractor assess your site's unique needs?

5 SCHEDULE

How far in advance are projects being booked and how long might your project take?

What are the contractor's payment terms?

Do they require a deposit upfront to secure the timing of the project?

6 DOCUMENTATION

Does the contractor have the proper licensing for their work?

Does the contractor have liability insurance and are employees covered by Workers Compensation?

Will permits be required for the job and if so, who is responsible to secure them?

7 COMPATIBILITY

Do you like this contractor? Can you trust them? Can you easily communicate and understand each other?

Will the person you're meeting be on site throughout the project or will someone else be your day-to-day point of contact?

Contact references to help understand how your contractor will operate throughout a project.

8 DESIGN

Do they offer a design service? What is the cost for this?

Do they offer hand-drawn or 3D-rendered concept designs?

Are the contractor's designs something you would like for your project?

Time to Break Ground

1 EXCAVATION

All outdoor projects should begin with the removal of grass and topsoil. The depth will be determined by two things:

1. **Soil Type** - Sandier soil requires less excavation than clay-based soil.
2. **Use** - Patios and walkways, which take lighter loads should require less excavation than driveways and retaining walls, which require deeper excavation.

Depth of excavation can be reduced significantly if a layer of DriveGrid is placed at the bottom of the excavation before gravel gets placed. Loose subsoil should always be compacted prior to installing DriveGrid and gravel.

Learn about frequently used terms in the hardscape industry.

2 GRAVEL BASE

A gravel base is placed into the excavated area. Ideally, this gravel base will need to be:

- > **Strong enough** to support the weight of anything placed on the surface.
- > **Free draining** to allow water to escape the base and enter the subsoil. A perforated drain pipe in the gravel base may be necessary for retaining walls in order to direct water away from the wall's base.
- > **Extended** at least 6" (150mm) beyond the finished paver surface's edges.
- > **Compacted** in several layers, using the proper equipment.

3 BEDDING LAYER

On top of the firm gravel base, a 1" (25mm) layer of sand or tiny stone chips is spread out and smoothed. This layer enables the levelling or sloping of paver or wall units for drainage and smoothness.

Some contractors may recommend a poured concrete surface over a standard bedding layer, which is acceptable if the concrete is carefully poured and rests on a solid, well-drained base.

Note: Once concrete is poured, the height of paver or wall units can no longer be adjusted.

4 RESTRAINT SYSTEM

To prevent pavers from shifting, a concrete edge will be constructed or an edge restraint fixed with long metal spikes. For walls, adhesive can be used to secure rows of blocks together. Larger retaining walls may require geogrid every few layers to secure the wall into the soil that is being retained.

5 JOINT MATERIAL

There are three types of joint material to choose from:

Basic Jointing Sand - Years ago, this was the only joint material available. As it wears away, issues with weeds could arise. If you decide to choose basic sand, we advise using a joint stabilizing sealant and be ready to top up the sand as necessary.

Polymeric Sand - This special sand is blended with a binding ingredient to help it stay in place longer. Check with your local Unilock Dealer for the best jointing sand/compound for your project.

Resin Sand - Resin sands are the strongest jointing sand available, and have been proven to have the longest lifespan of any jointing sand. Different resin sands are available for various uses.

6 SEALING

Unilock pavers will be durable with or without a sealer. Some homeowners may choose to apply a sealer to enhance paver color, while others choose to appreciate the color of the pavers as they are. If you decide to seal, be prepared to re-seal your pavers every 3-5 years.

Factory-Sealed Products

Elegance® pavers and Unilock® pavers manufactured with EasyClean™ have been pre-sealed at the factory. To clean and brighten the surface at any time, a gentle power washing of the surface is recommended. If you wish to re-seal, wait a minimum of three years before applying sealant. Use only solvent-based sealants on factory-sealed products.

PAVER CONSTRUCTION

WALL CONSTRUCTION

A proper base ensures that your pavers and walls won't shift during freeze/thaw cycles.

The Choice of Design Professionals

For decades, architects, landscape architects, and engineers have used the same Unilock products that are available to homeowners to design world-class commercial spaces across North America.

Creative Campus, Columbus OH Designer: MKSK Studios

Indianapolis Motor Speedway, Indianapolis, IN Designer: Browning Day Mullins Dierdorf

Pier 4, Boston, MA
Designer: Mikyoung Kim Design

White Plains Public Library, White Plains, NY
Designer: IQ Landscape Architects

Our Quality Commitment

Visit Unilock.com to register for your Transferable Lifetime Guarantee.

Unilock was the first concrete paver manufacturer in North America to offer a Lifetime Guarantee, and since then we have continued to stand behind it to ensure customers are completely satisfied with our products. With almost 2 billion stones in the ground, that's quite the commitment!

Our products are better and stronger than other brands. In fact, our internal standards of manufacturing in the USA and Canada far exceed industry standards set by ASTM (American Society for Testing and Materials) and CSA (Canadian Standards Association) and other European organizations.

LIFETIME GUARANTEE - RESIDENTIAL

Our Transferable Lifetime Guarantee warranties the structural integrity of Unilock concrete paving stones and retaining wall units when used in residential applications. It covers any structural failure or deterioration of the concrete unit resulting from normal use or from the reasonable application of sodium chloride (common rock salt used for de-icing). StoneMark™ products have the same warranties as Unilock paving stones and retaining walls, but cannot be warranted against damage resulting from de-icing products.

Any materials installed and maintained to our guidelines, and subject to normal wear, that prove defective, will be replaced without cost. Proof of purchase is required. Customers are encouraged to submit receipts to us as soon as their project is complete, using the Unilock

Warranty Registration Form on our website (Unilock.com).

Purchasers need to ensure that the product they purchase is appropriate for their intended application; for example, only certain thicknesses of products are appropriate for driveways. Color matching of the replacement product and/or lost time cannot be guaranteed and labor costs related to installing replacement product is not included. Unilock reserves the right to seek a professional diagnosis and opinion to determine the exact cause of the product failure. If the failure falls within our warranty parameters, Unilock will replace the defective product.

EXCLUSIONS - Unfortunately, some things are beyond the control of Unilock, and are therefore not covered by this warranty. These include: naturally occurring efflorescence, hazing from polymeric jointing sand, scratching and chipping resulting from snow removal or construction equipment, damage caused by natural or un-natural disasters, or negligence by anyone other than Unilock. While EasyClean helps to increase a paver's resistance to staining from various substances, it does not make our products stain-proof nor does it resist every kind of stain. The Unilock warranty also does not cover deterioration or damage as a result of poor design or poor installation practices that are contrary to specifications as laid out by ICPI (Interlocking Concrete Pavement Institute) and the NCMA (National Concrete Masonry Association). For more information please visit www.icpi.org and www.ncma.org. Additionally, please refer to the Maintenance, Color and Installation Advisories.

MAINTENANCE ADVISORY

1. Cleaning and Sealing

As with anything that is outdoors, Unilock products are subject to harsh weather, dust, acid rain, leaf stains, water stains and general wear from foot or vehicular traffic. Therefore, periodic cleaning using environmentally safe detergents designed for cleaning concrete is recommended to maintain a bright, fresh appearance.

To make subsequent cleaning easier and more effective, a concrete sealer can be applied to new or cleaned products to help prevent the penetration of substances that can cause stains.

There are many types of concrete cleaners and sealers on the market. Always read the instructions carefully before using the product to make sure that it will function as expected. Testing first, in a small unobtrusive area, is always a good idea to ensure the results are acceptable. Consult your local hardscape dealer to find the products best suited for your paver or wall installation.

2. Winter Maintenance

Snow removal by way of metal blades on plows or shovels will scratch and chip the surface of pavers, causing permanent damage. To mitigate this risk, metal snow clearing blades must always have a polyurethane or rubber cutting edge attached when plowing pavers.

De-icing Salts - The use of de-icing products on paver surfaces is important for safety and to help mitigate snow accumulation. Most de-icing products will have some effect on concrete, even if the product label indicates that it

is safe on concrete. If you must use a de-icing product, we recommend that you use Sodium Chloride (ordinary rock salt) or Calcium Chloride (for colder climates). Always apply sparingly. The use of de-icing products on StoneMark, wet-cast pavers, slabs or coping may damage the product and therefore is not recommended. Whenever possible use a coarse sand as an anti-slip measure instead of de-icing chemicals.

COLOR ADVISORY

1. Selection

Due to the inherently variable nature of printed materials and digital monitors, Unilock cannot guarantee that products will match the color of printed or online images. Therefore, when making final product selections, decisions should be made based on actual stones which are readily available from Unilock, Authorized Contractors or Authorized Dealers. Most Unilock products are not comprised of a single color, but rather contain blended colors for a more natural appearance. This means that there will be significant color variance from stone to stone, so purchasers should view multiple units together to get a more accurate impression of the overall color. *Note: Unilock Natural Stone variations are outside the control of Unilock. Purchasers of natural stone must be willing to accept this inherent variability.*

2. Pre-installation checking

Always check the label to ensure that the Unilock product delivered to your project is the product and color ordered. If there is a discrepancy, or if the product

inside the packaging doesn't appear to be correct, contact your hardscape dealer before installing any pavers or wall units. If the product is installed, it indicates your acceptance of the products as delivered.

3. Blending

If the project requires more than one bundle of product it's always a good idea to draw product from several bundles when installing, as this ensures that any variation between bundles will be seamlessly integrated in the project. When bundles are from different production runs, random selection from multiple bundles is even more important.

4. Efflorescence

Efflorescence is a naturally occurring process that may appear as a white or light grey powder on the surface of concrete, clay or natural stone. It is temporary, and will disappear over time. However, if it is bothersome, an efflorescence cleaner can be used to remove it. There is no way to predict or prevent efflorescence. Because it does not compromise the structural integrity of the product, it is not covered by Unilock product warranties.

INSTALLATION ADVISORY

1. Construction Residue

While a certain amount of dirt on pavers and walls is inevitable during the construction phase, installers are strongly encouraged to clean as they go as construction residue can embed in the surface and become difficult to remove. The slurry produced during wet-saw cutting is particularly stubborn to clean if allowed to dry on the surface of

pavers. Unilock warranties do not cover stains caused by a failure to remove construction residue.

2. Polymeric Haze

Surface hazing caused by polymeric jointing sand is not the responsibility of Unilock. Polymeric jointing sand should only be installed by an experienced and knowledgeable contractor. Any sand that is left on the surface prior to activation will result in a haze that is very difficult and time-consuming to remove. Only the highest quality, brand name polymeric sand that is guaranteed by the manufacturer should be used.

3. Compaction Damage

Both smooth and textured paver surfaces can be scratched by compaction equipment used to 'flatten' a new paver installation. Therefore, metal plate compactors must be fitted with a polyethylene mat to protect the paver surface from becoming scratched, or a superior option is to use a rubber-roller compactor instead. Damage to product surfaces caused by failure to follow these instructions is not covered by Unilock product warranties.

FIRE PIT WARNING

Wood-burning fire pits must be lined with a proper metal insert or refractory (fire-rated) brick to protect the concrete components from extreme exposure to heat. Extreme heat on a concrete surface may affect the structural integrity of the concrete and can be dangerous. The floor of the fire pit should always be constructed using refractory brick or a sand bed. For your safety, always use a spark screen over the fire.
