

GILL LANDSCAPE CONTRACTING I

## Landscape Planting Warranty

**Gill Landscape Contracting, Inc.** ensures that all plants installed are placed in healthy, suitable conditions to promote their growth and development. Once installed, it is the responsibility of the property owner(s) to provide ongoing care, including proper watering, fertilization, and maintenance.

### Warranty Coverage:

- **Trees & Shrubs:** These plants are covered by a one-year warranty from the date of installation. If a tree or shrub dies within this period, it will be replaced once at no charge for the plant.
- **Labor:** Please note that while the plant itself is warranted, **labor costs for re-installation** are not covered under the warranty. A service call fee will apply if **Gill Landscape Contracting, Inc.** is required to reinstall new plants.
- **Exclusions:**
  - **Annuals, Perennials, Bulbs, and Ground Covers** are not covered under warranty.
  - Plants damaged or killed by **pests, insect infestations, extreme weather (e.g., frost, drought, high winds), or other uncontrollable conditions** are not eligible for replacement under this warranty.
  - **Seasonal dieback** of plants that can recover with proper pruning and care is not covered.
  - **Transplants** (plants moved after installation) are not covered under the warranty.
  - **Acts of God:** Damages due to extreme weather events (such as heavy rain or flooding) and destruction caused by animals are not covered, particularly for newly installed grass seed.

### Important Notes:

- The owner must provide regular care to minimize plant stress, especially during extreme weather conditions.
- Moving plants after installation will void the warranty.
- If you believe you have a warranty claim, please review the care guides and warranty terms prior to submitting a request. To submit a warranty claim, visit [Gill Landscape Contracting Warranty Form](#).
